(616) 448-8402

### Experience

---

#### Artisan Digital Media - Full Stack Developer

8/2022 - Present

Develop, debug, design and deploy websites and web applications for a variety of client types and across several tech stacks. Write cross-platform data migrations. Work with a variety of CMS (Shopify, CraftCMS, Expression Engine). Build API integrations. Write HTML, CSS and JavaScript for frontend work and JavaScript(Node) and PHP for the backend. Develop custom modules and plugins for extending popular CMS functionality to fit client specifications and budget.

#### Herman Miller – Technical Machine Operator

10/2018 - 8/2019

Responsible for three CNC multi-axis combination router/mill/edgebanders, the staff to operate them, and all associated metric tracking, training, operation and safety processes. Owner of quality control, safety, LEAN principle adherence and training in my area. Track and analyzeS production statistics, safety incidents and quality diversions to extract meaningful data for consistently driving improvement.

#### Commercial Tool & Die – Upgrader

4/2018 - 4/2018

Responsible for upgrading molds and components from previous versions to match new drafters per customer request

### Projects

---

**facebook-clone:** built with React, React Context API and Firebase 9. Key features: Google authentication, Firebase Firestore real-time database.

**gmail-clone:** built with React, Redux, and Firebase 9. Key features: Google authentication, Firebase Firestore real-time database.

**hulu-clone:** built with React using Next.js and TailwindCSS. Key features: lazy loading, server-side rendering, Vercel deployment.

**medium-clone:** built with React using Next.js, Sanity CMS and TailwindCSS, Key features: server-side rendering, incremental static regeneration.

### Skills

---

#### Front End

JavaScript  
React.js  
jQuery  
Jinja  
Twig  
Liquid  
HTML  
CSS  
TailwindCSS  
Ajax  
AlpineJS  
SCSS  
Redux

#### Back End

Node  
PHP  
Python  
Shopify  
CraftCMS  
Expression Engine  
Django  
Docker/DDev  
MAMP  
Babel  
Webpack  
Gulp  
SQL  
GraphQL

### General

HTTP  
JSON  
Git

API integrations  
Asana/ActiveCollab  
Linux/WSL
